

Yvolution™

About Us

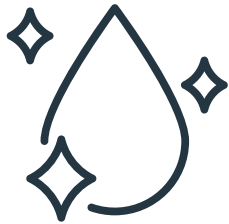

Born in Dublin, raised in California. We're a team of big kids who never grew up. We spent our childhood outside, racing around on anything with wheels and we still believe the outdoors is the best playground of all. Adrenaline is our fuel. Play is our teacher. That's why we make award winning scooters, balance bikes and Flikers with a single goal in mind.

For us, childhood is about exploration and adventure and running wild outside. No matter what your outdoors looks like, be it urban, suburban or rural, our products give kids an awesome sense of freedom.

Through safe wheeled fun, children learn new skills for themselves. From nailing balance, stability and strength, to experiencing that first feeling of achievement and confidence. At Yvolution we're on a mission to keep childhood, fun, wild and free.

IRISH DESIGN

1. Product Materials

- Sustainable materials (PLASTIX) recycled nylon fishing nets.
- Recycled nylons and PP.
- Recycled aluminum
Move away from “dirty” processes – co-molding, anodizing, wasteful manufacturing techniques.

2. Packaging

- Zero single use plastics in all our packaging.
- Recycled pulp and/or fully recyclable packaging (no plastic film additions to packaging exterior).
- No plastic packaging handles, using slot in box for carry handles.
- Printing instruction manuals on box. exterior or QR code IM linking.
- Zero-tape policy.

3. Built to Last

- Utilization of weather resistant, impact resistant and generally hard-wearing materials to maximize the lifespan of our products.
- Design for ease of customer spare part replaceability.
- Promotes handing down of products from sibling to sibling / family to family.

4. Secondary Use

- Design for multipurpose use/ secondary use.
- Creates value for the customer.
- Reduces/prevents wastage by customer.

5. Education

- Educating our customers on how our products can be disassembled and separated by their materials for recycling at end of life.
- Educating our young riders on the importance of recycling.

6. Accreditation

- Partnering with recognized organizations that can verify our sustainable commitments that we make to our customers.
- Gives peace of mind to customers.
- Build our accreditation partners as we build and evolve our eco strategy.

Everything Balanced...

Perfection from top to bottom, our multi-award-winning Y Velo bikes create a smooth, easy ride for children age 18 months to 5 years old. Parents choose our lightweight Y Velo Junior balance bike for one very simple reason: the iconic dual rear wheels that allow kids to practice with stable 9" double-width wheels before switching to a single wheel as the kids build confidence.

Product Weight: 3.9kg Max User Weight: 25kg

Velo Trike has been designed to provide young kids with 2 ways to learn and develop balance skills. Trike Mode builds confidence as the rear wheels are widely separated, creating a super stable platform for kids to pedal themselves along. The extra-long seat means kids of different heights can easily find their perfect reach to the pedals by sitting further forwards or backwards on the seat - a unique feature in tricycles.

With the push of a button, the rear wheels rotate inside the rear fork creating a less stable (but still stable!) Balance Trainer platform for kids to train their balance without pedals, walking themselves along with the product.

Velo Pro is our new “true” outdoor balance bike. 12” COMPASS pneumatic wheels provide great grip on outdoor trails while absorbing bumps - great for a comfortable ride. Smooth continuous surfaces achieved through a lightweight, injected plastic frame ensure there are no sharp edges for kids to catch their legs on as they ride. Hardware is flush with the frame.

FLIKERTM

The Original...The Best

We wanted to create a scooter that was fun to ride, provided a workout for the whole body (not just tiring out your legs), and was completely unlike any other ride out there. The result was the first Y Fliker, an innovative three-wheeled scooter that won us awards and respect from every kid in the playground.

FliKERTM PRO

Product Weight: 7.4kg Max User Weight: 100kg

With Fliker Pro, for the first time, we've separated the footplates from the body of the scooter with our patent pending FLEX TECHNOLOGY system.

This gives users the sensation of skiing on the street. Flexing footplates connect the body with Fliker Pro through the feet, resulting in outstanding control and extreme speed. Carve and drift into turns like never before. Move faster, turn tighter

My Buddy Wheels

≡ Rock & Roller ≡

The little ones can get started as early as 10 months old on the Rocker mode, where they can learn balance and strengthen their core, rocking back and forth. The extra grippy texture in the base encourages the correct placement of feet, while the My Buddy Wheels' careful design prevents any dangers such as tip-overs.

On the Roller mode, the wide base keeps your child steady as they push themselves along on our adorable buddies. The child friendly steering allows them to ride around the house, intuitively propelling themselves with their feet. The 360° castor wheels allow for movements in any direction, building balance and coordination. Specifically designed for indoor use, the soft wheels provide benefits such as noise reduction and floor protection.

My Buddy Wheels

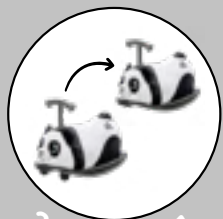

≡ Rock & Roller ≡

PACO the Panda

Paco's special skill is listening, he will always help his friends when they need. You can find him in the bamboo fields eating his favourite food!

Made with recycled PET filling, Paco is eco friendly and soft. The extra grippy footplates encourage correct placement of feet in rocking mode.

For safety, a bumper prevents falls and tip over during use. The front castors and rear fixed wheels are easily removed by hand to convert to rocking mode. The TPR wheels are designed for a smooth ride, noise dampening and reduce scuffing on floors as your kids play with their new friend!
